Jump elements

QUESTION:

Is the 1.1 factor for Jump elements started in the second half of a Short or Free Program valid in cases of Interruptions (see Rule 515)?

ANSWER:

**This factor is valid in cases of Interruptions of up to 40 seconds.
In cases of Interruptions up to 3 minutes Jump elements started in the second half, but after an Interruption, will not have this factor. Jump elements started in the second half of the program, but before such an Interruption, will still have the 1.1 factor.**
